

LIT

Latent Image Technologies

LIT

Company Profile

Established 1996, LIT is a privately-owned high technology company.

LIT offers turn-key solutions for protecting authentic products and documents from any kind of counterfeiting or forgery. Our latent image technology can be used to protect any type of product or document: from government Tax-Stamps, ID cards and medicines to expensive cigars, car spare parts, cellular phones and designer hand bags.

We use complex optical and chemical processing technologies that were developed over the past 22 years. Our technology is protected by registered patents world wide.

During the past 12 years we have gathered a vast "hands on", practical experience, with the implementation of our solutions in various industries and market segments.

Call Now! Our applications engineers will gladly assist you in defining your anti counterfeiting and security needs
